DIARY NOTES

DD/S *[Handwritten signature]*

13 December 1962

25X1A9a

1. [REDACTED] discussed with me General Carter's interest in obtaining

[REDACTED]

25X1A9a

2. [REDACTED] reported that he briefed the Director this morning on the undesirability of using KW-26's behind the Iron Curtain. He checked this out with General Blake of General Services Administration, who was in complete agreement.

3. John Tietjen was in to brief Gates Lloyd and me on where he stood with regard to the A&E Staff. Without going into all of the details, he wanted at this time to take all possible steps to strengthen the A&E Staff. He also felt that it was going to be necessary to find out before too long just exactly what the Technical Services Division proposed to do in the assessment and evaluation field. I concurred in both of these basic fundamental principles. *H*

4. Mr. [REDACTED] attorney for [REDACTED], telephoned to say that Dr. [REDACTED] had about decided that he would have to dispose of the [REDACTED] and probably wouldn't get more than \$30,000 to \$35,000 for it. He suggested that one way the Agency might be able to help [REDACTED] would be to give him some contracts in other fields in which we had an interest and in which he had some competence. I told Mr. [REDACTED] that he would be hearing from me within a few days, but I did not comment on his suggestion that we find some other way to give Dr. [REDACTED] a contract. *H*
